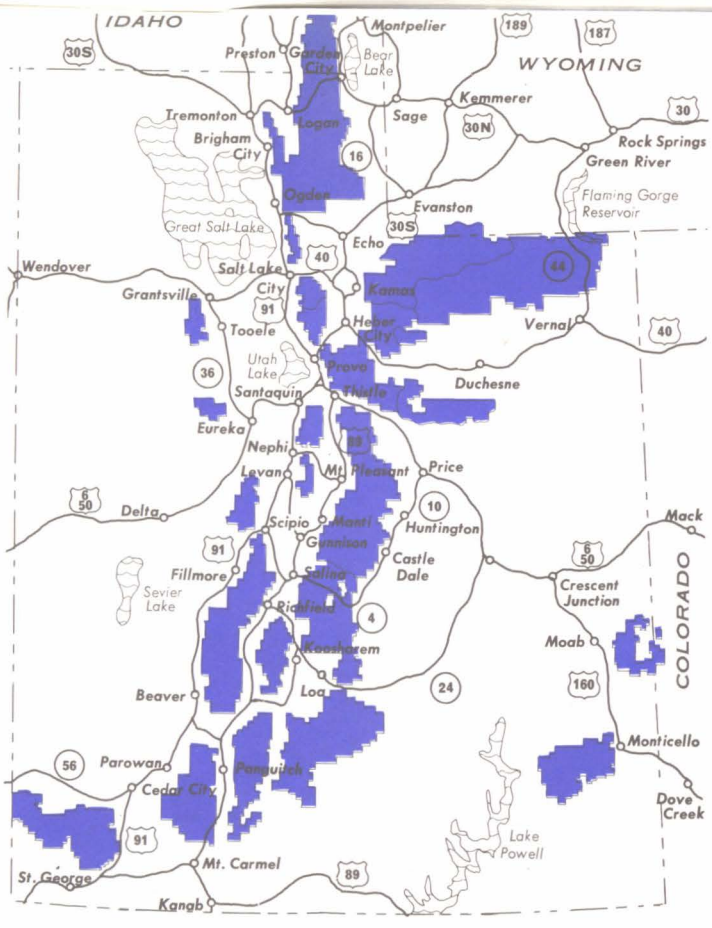
Introduction

NATIONAL FOREST RECREATION IN UTAH

Property of
National FS Library
USDA Forest Service
240 W Prospect Rd
Fort Collins CO 80526

Blended into the mosaic of Utah's landscape are nine National Forests — Ashley, Cache, Dixie, Fishlake, Manti-LaSal, Uinta, Wasatch, and parts of Caribou* and Sawtooth.* They contain over seven million acres, and each acre is woven into the life and economy of the State and the Intermountain Region.

Water, timber, forage, and wildlife are products of these Forests, and they provide year-round recreation for millions of visitors. From north on the Cache to south on the Dixie, you'll find the best in outdoor living. In this land of sun and snow, there are mountains for hiking and skiing, water for boating and fishing, room to camp and picnic, and scenery to enjoy.



The splendid snow found on National Forests in Utah is being discovered by ski enthusiasts from all over the world. Forest Service personnel recognize their responsibility to the growing number of skiers. Seventeen ski resorts in Utah are all or partially on National Forest land, and many Forest Service Snow Rangers, trained in the ways of snow, are on hand to help make skiing safe.

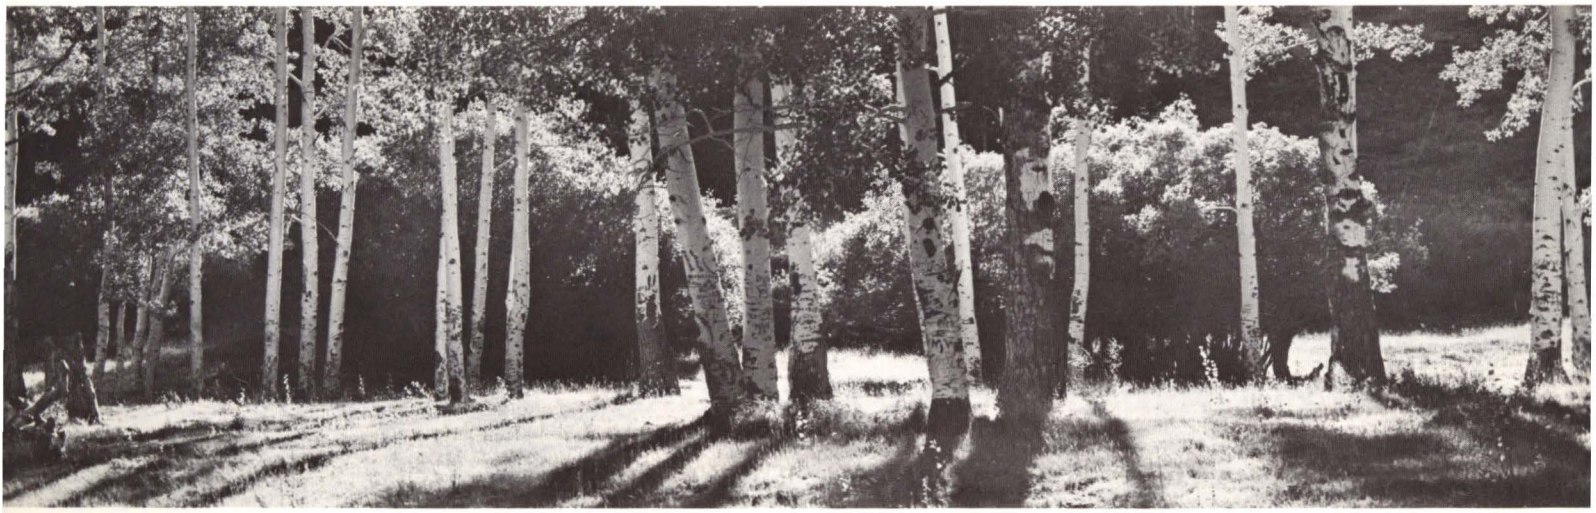
Beauty is preserved while valuable resources are used and harvested. Snow melts into lakes and streams and the water is protected for use in homes and industries. Timber is harvested, cattle and sheep graze, and many species of wildlife make their home on these National Forests. Recreationists can find pleasant facilities in their favorite camping, hunting, fishing, and hiking areas.

While each Natoinal Forest in Utah offers many outstanding attractions, three areas are especially pointed out for their unique characteristics. These are the Flaming Gorge recreation area, jointly administered by the Ashley National Forest and the National Park Service; the High Uintas Primitive Area on the Wasatch and Ashley National Forests; and the Mt. Timpanogos Scenic Area on the Uinta National Forest. Each area offers a unique and rewarding outdoor experience.

*For information on Caribou National Forest write to:
Forest Supervisor
427 North Sixth Avenue
Pocatello, Idaho 83201

*For information on Sawtooth National Forest write to:
Forest Supervisor
1525 Addison Avenue East
Twin Falls, Idaho 83301

THE FEDERAL RECREATION AREA ENTRANCE PERMIT IS REQUIRED IN MOST NATIONAL FOREST CAMP AND PICNIC GROUNDS. THIS WALLET-SIZED "GOLDEN PASSPORT" SELLS FOR $7 AND ADMITS THE PURCHASER AND ALL PASSENGERS IN HIS CAR TO ANY FEDERAL RECREATION AREA. CHARGE AREAS ARE CLEARLY MARKED, AND A SINGLE DAY PERMIT MAY BE PURCHASED FOR $1 INSTEAD OF THE $7 YEARLY PERMIT. MONEY FROM THE SALE OF THESE PERMITS GOES INTO THE LAND AND WATER CONSERVATION FUND. APPROPRIATIONS FROM THE FUND ASSIST STATES AND THEIR LOCAL GOVERNMENTS IN MEETING URGENT OUTDOOR RECREATION NEEDS.



PROTECT AND ENJOY YOUR NATIONAL FOREST HERITAGE

YOU AND YOUR OUTING

Your National Forest outing will be a success if you follow a few simple suggestions.

THINGS TO BRING

Bring your shelter, sleeping and cooking equipment, and plenty of food.

Always carry an ax, shovel, and bucket in your car. (This is required in some National Forests.) You'll need them in camp and they'll be handy to put out campfires and to use in case of forest fire.

A PLACE TO STAY

Campgrounds are filled on a first-come, first-served basis.

Group reservations can be made in some campgrounds through the local Forest Ranger.

Camp trailers and campers on pickup trucks may be used at most campgrounds. Hookups for power, water, and sanitation are usually not available.

FRIENDLY FIRES

Build your fires in designated grills, stoves, or fire circles when using improved campgrounds. When camping in the open, scrape a circular area down to mineral soil at least four times the diameter of your fire, removing all branches and inflammable material to a safe distance.

To put out a campfire stir the coals while drenching them with water. Turn sticks and douse both sides; soak the ground around the fire.

If you can't get water, mix the fire with mineral earth and keep stirring and mixing in fresh earth until the last spark is dead.

Be sure to check on local rules and special requirements during periods of extreme fire danger.

KEEP WATER CLEAN

Prevent the pollution of all water. It may be a community's drinking water. Use garbage containers for all the waste which cannot be burned.

Be cautious about drinking water from streams. Clear-looking water may not be pure.

BEAUTY FOR TODAY AND TOMORROW

The beauties of nature — trees, flowers, shrubs, and wildlife — are yours to enjoy. Protect them and the improvements placed in campgrounds for your convenience so you and others may enjoy them over and over again.

Leave a clean camp — as you'd like to find it. The tables, toilets, and shelters are for your convenience, but they are expensive to construct and maintain. Take good care of them.

PLEASE DO

Observe State and Federal game and fish regulations and boating laws.

Know in advance where to go and whom to contact in case of emergency. If you plan a hike to back country, get reliable maps and good shoes. Let the Ranger know where you are going and when you get back.

PLEASE DON'T

Discharge fireworks in National Forests. This is prohibited. Please don't cut trees or harm shrubbery and wild flowers.

INFORMATION

Forest Supervisor's offices and Forest Ranger's offices will be glad to provide more information.

ASHLEY NATIONAL FOREST

HISTORY:

President Theodore Roosevelt established the Ashley National Forest July 1, 1908. It was named for William Ashley, an early explorer in this area. Utah and Shoshone Indians roamed the land, and it was visited in 1776 by Domingues and Escalante, Spanish explorers.

GEOGRAPHY:

Located in the northeastern corner of Utah, the nearly 1⅓ million acres of the Ashley National Forest span jagged peaks, forested mountains, brush covered benchlands, and deep, rocky gorges. Rugged Uintah Mountains range east-west and contain the highest peak in Utah — Kings Peak, 13,528 feet.

ATTRACTIONS:

Flaming Gorge Recreation Area
Sheep Creek Geological Area
High Uintas Primitive Area
Red Canyon Visitor Center

PRODUCTS:

Rangelands produce forage for about 10,000 cattle and 58,000 sheep each summer. About 10 million board feet of lumber is harvested each year. The Forest provides a home for wildlife, water for homes and industries, and exceptional recreation opportunities.

CACHE NATIONAL FOREST

HISTORY:

In 1907 President Theodore Roosevelt established the Logan National Forest and in 1908 the name was changed to Cache National Forest. Part of the area had first been set aside in 1903 as the Logan Forest Reserve. The name of the Forest comes from nearby Cache Valley, where early day trappers cached their furs.

GEOGRAPHY:

The nearly ½ million acres of the Cache National Forest extend from Weber Canyon in northern Utah to Soda Springs in southern Idaho. Elevations range from rocky peaks over 10,000 feet to foothills and valleys below 5,000 feet. Unusual rock formations are found in many canyons.

ATTRACTIONS:

Logan Canyon, between Logan and Bear Lake
Jardine Juniper, about 15 miles up Logan Canyon
Minnetonka Cave in St. Charles Canyon
Limber Pine Nature Trail at the head of Logan Canyon
Pineview Reservoir and Ogden Canyon

PRODUCTS:

About five million board feet of sawtimber can be harvested each year, and some 11,000 cattle and 49,000 sheep graze during summer months. Numerous springs and reservoirs provide water for surrounding communities. Mule deer and elk are abundant, as well as many other forms of wildlife.

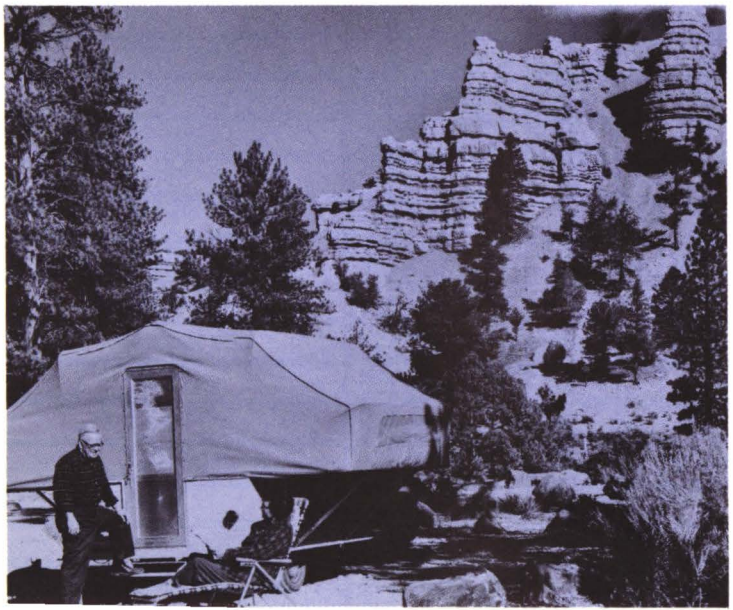
DIXIE NATIONAL FOREST



HISTORY:

Between 1902 and 1905 the various parts of the Dixie National Forest, then under different names, were withdrawn from the public domain and placed under National Forest management. The prehistoric Anasazi culture first inhabited this country, followed later by the Piute Indians. Later, Father Escalante was the first white man to record his travels through this area.

GEOGRAPHY:

The largest National Forest in Utah, the Dixie stretches for 170 miles across the high plateaus and deep canyons of southern Utah, between the Great Basin and the Colorado River. It includes parts of the Markagunt, Paunsaugunt, Aquarius, and Boulder Mountain Plateaus. Elevations range from 2,800 feet near St. George to 11,314 feet at Brian Head.

ATTRACTIONS:

Panguitch Lake and Navajo Lake
Strawberry Point
Boulder Mountain
Pine Valley
Red Canyon

PRODUCTS:

A harvest of 24 million board feet of lumber each year makes the Dixie National Forest the largest timber producer in Utah. The Forest is a source of water for many surrounding communities, and about 18,000 cattle and 29,000 sheep graze each summer. The abundant wildlife, including wild turkeys, attracts hunters from many States.

FISHLAKE NATIONAL FOREST

HISTORY:

The Fish Lake Forest Reserve was established by proclamation of President McKinley in 1899, and in 1907 President Theodore Roosevelt made it a National Forest. The name became one word-Fishlake—in 1908, when all of three National Forests and part of another were added to it. The name comes from Fish Lake, a body of water covering 2,600 acres.

GEOGRAPHY:

Four large blocks of land make up the 1½ million acres of the Fishlake National Forest on the High Plateaus in central Utah south of the Great Salt Lake Basin. It includes part of the Wasatch, Aquarius, Sevier, and Tushar Plateaus and all of the Fish Lake and Pahvant Plateaus. Most of the land lies between plateau rims and valleys. Elevations range from about 5,500 feet to 11,000 feet.

ATTRACTIONS:

Fish Lake	Monroe Mountain
Maple Canyon	Thousand Lake Mountain

PRODUCTS:

About 20,000 cattle and 33,000 sheep graze each year on rangelands of the Fishlake National Forest. Timber harvest is around 2 million board feet. There is good fishing on much of the Forest and deer hunting lures many hunters from other states each year. In addition to supplying water for both the Colorado River and Great Basin Drainage, the forest lands provide water for numerous farms and 26 surrounding communities.

MANTI-LASAL NATIONAL FOREST

HISTORY:

The Manti portion of the Manti-LaSal National Forest was established in 1903 at the request of local citizens. The LaSal portion was established a short time later, and in 1949 the two were combined to form the present Forest. Highly developed Indian civilizations, such as the Anasazi, once occupied this land.

GEOGRAPHY:

Including more than 1⅓ million acres, the two divisions of the Manti-LaSal National Forest offer striking contrasts in geologic formations and vegetation. The Manti Division runs north and south on the Wasatch Plateau in central Utah, and the LaSal Division rises like green islands in the desert country near the Utah-Colorado border.

ATTRACTIONS:

Skyline Drive, Ferron Canyon, and Huntington Canyon on the Manti Division

Indian petroglyphs and pictographs on the LaSal Division

PRODUCTS:

The Forest is a water supply for 27 communities and home for all types of wildlife, from lion to wild turkey. It provides good fishing and is recognized nationally for excellent deer hunting. Grazing is available for about 19,000 cattle and 101,000 sheep. An important timber producer, the Manti-LaSal keeps about 16 sawmills operating.

UINTA NATIONAL FOREST

HISTORY:

The first forest in Utah was the Uintah Forest Reserve, established by proclamation of President Grover Cleveland in 1897. The spelling was later changed to Uinta, and in 1907 Forest Reserve was changed to National Forest. Father Escalante, a visitor to this area in 1776, was impressed by the beauty and fertility of the land.

GEOGRAPHY:

The more than 780 thousand acres of the Uinta National Forest extend along the Wasatch Mountains from the Provo River to the vicinity south of Nephi. Lofty mountains are part of this Forest, including Mt. Timpanogos, 11,750 feet, and Mt. Nebo, 11,871 feet. Important watershed rehabilitation projects have received widespread attention.

ATTRACTIONS:

Mt. Timpanogos Scenic Area
Scenic Loop Roads: Alpine, Squaw Peak, and Nebo
Provo Canyon

PRODUCTS:

Fish are harvested from 200 miles of streams plus 140 acres of lakes and reservoirs. Mule deer and elk herds inhabit the Forest along with a variety of other wildlife. About five million board feet of timber is harvested each year, and more than 8,000 cattle and 77,000 sheep obtain forage from some 359,000 acres of rangeland.

WASATCH NATIONAL FOREST

HISTORY:

The Wasatch National Forest was created in 1906 by Presidential proclamation. When early day explorers came to this country, the Utah, Piute, and Ute Indian tribes lived in the semidesert valleys. Many wagon trains passed through on their way to California, and in 1847 the Mormons settled in valleys at the foot of the Wasatch Mountains.

GEOGRAPHY:

Almost a million acres of rough mountainous country are included in the Wasatch National Forest. The largest portion is in north central Utah, but over 36 thousand acres spill over the border into Wyoming. Elevations range from the lofty land of the High Uintas Primitive Area, where some mountains rise above 12,000 feet, to the foothills and valleys, between 4,000 and 5,000 feet.

ATTRACTIONS:

Ski Resorts: Alta in Little Cottonwood Canyon, Brighton and Solitude in Big Cottonwood Canyon, and Little Mountain in Emigration Canyon.

Mirror Lake High Uintas Primitive Area

PRODUCTS:

Wildlife is abundant, including over 23,000 mule deer, 400 elk, and Utah's best established moose herd. Over 6,000 cattle and 32,000 sheep graze the ranges. About six million board feet of wood is harvested annually, and watersheds supply water to 40 communities and many industries.

MULTIPLE USE FOR THE GREATEST GOOD

"The Forest Service of the U. S. Department of Agriculture is dedicated to the principle of multiple use management of the Nation's forest resources for sustained yields of wood, water, forage, wildlife, and recreation. Through forestry research, cooperation with the states and private forest owners, and management of the National Forests and National Grasslands, it strives — as directed by Congress — to provide increasingly greater service to a growing Nation."
